

Lecture in “Economics of Technical Change“ (v2/Ü2, 16ss-19317)

Prof. Dr. Reinhard Madlener, Chair of Energy Economics and Management

Description

“Economics of technical change” addresses technological and organizational improvements at the core of economic growth. Following a micro- and macroeconomics approach, this course sheds light on basic concepts at the root of technical change and traditional economic theories. Thus, emphasis is placed on the dynamics behind investments in R&D, innovation adoption (mainly taking place at the firm level) and diffusion as well as organizational and institutional change. Examples and empirical evidence are provided in support of the theory. Among other topics, the course tackles industrial measures designed to enhance knowledge protection and transfer – such as standardization, intellectual property and patenting –, but also path dependence and lock-in effects, endogenous growth theories, and structural change. In this context, policy perspectives and implications are also addressed.

Organization

Successful participation in this course requires registration via CAMPUS and passing of a written exam¹ (60 minutes) at the end of the course. Exercise units will accompany the lecture. Slides and additional material will be provided via the e-Learning platform (L²P). Date and venue of lectures and exercise units are available on CAMPUS as well as under the [“Teaching” section of the FCN website](#).

Timetable and contents

Teaching unit	Topic/s covered	Lecture (Mondays 18:15-19:45 hrs)	Exercise unit (Thursdays 10:15-11:45 hrs)	Textbook chapter/s
1	Introduction; Basic definitions and concepts	Apr 11	Apr 14	[1] Ch. 1; [4] Ch.3
2	Knowledge as a public good	Apr 18	Apr 21	[8] Ch. 4
3	Intellectual property, patents, and open technologies	Apr 25	Apr 28	[1] Ch. 9
	No lecture/ No exercise unit	May 2	May 5 (Holiday)	-
4	Standardization & competition; Adoption of technology	May 9	May 12	[3] Ch. 3, 4, 14; [7] Ch.4
Excursion week				
	No lecture/ No exercise unit	May 23	May 25 (Holiday)	-
5	Diffusion of technology	May 30	Jun 2	[1] Ch. 16; [8] Ch. 7
6	Regional aspects of innovation and diffusion	Jun 6	Jun 9	[6] Ch. 61; [4] Ch.3
7	Financing aspects of investments in R&D	Jun 13	Jun 16	[8] Ch. 8
	No lecture/ No exercise unit	Jun 20	Jun 23	-
8	Path dependence and lock-in	Jun 27	Jun 30	[1] Ch. 3,5; [5] Ch. 1,4,10
9	Innovation, structural change, GPTs, and economic growth	Jul 4	Jul 7	[1] Ch. 14; [2] Ch. 1
10	Policy considerations	Jul 11	Jul 14	[8] Ch. 12
11	Q&A	Jul 18	Jul 21	-

¹ The written examination will take place on August 5, 2016 (1st session) and September 27, 2016 (2nd session).

Preparation for the exam

For a good understanding of each lecture topic, we recommend you to base your preparation on lecture slides as well as on the material contained in the L²P folder “Compulsory literature”. Compulsory literature comprises the textbook chapters mentioned above and selected seminal papers.

Learning goals

- Getting a sound understanding of definitions and concepts characterizing the economics of technical change
- Being able to clearly illustrate economic theories and policies presented during the course with the provision of *ad-hoc* examples
- Being able to take part in interdisciplinary discussions
- Being able to screen and use the literature on the economics of technical change for your own purposes
- Being able to apply the knowledge gained during the course to the analysis of real-world problems

Group of participants

Enrolment to this course is mainly open to master’s students from business administration, economics, as well as students with double-degree in economics, industrial engineering and related fields. In order to know whether you are allowed to take this course, please get in touch with your study advisor.

Prerequisites: Basic knowledge of microeconomics.
