Lecture and Exercise (V2/Ü2) in

Smart Grid Economics and Information Management

17ss-42457 (Vorlesung), 17ss-54271 (Übung), 17ss-46631, 17ss-50221 (Klausur)

Description

The scope of the lecture is economics and information management of energy markets. The integration of the growing number of renewable energy sources imposes new challenges on energy markets and the power system. For a better coordination of supply and demand it is necessary to interlink centralized and decentralized generators, storage devices, as well as consumers with each other by means of information and communication technologies (ICT). Current electricity networks are extended by intelligent ICT components thus incorporating the "Smart Grid". The existing market structures for electricity have to be adjusted in order to successfully integrate an increasing number of renewable energy producers, electric vehicles and new concepts like demand side management. Apart from the regulatory and economic background, methods for modeling and analyzing energy markets (i.e. agent-based simulation) are introduced and explained during the course.

Course outline:

1. Electricity Markets
 - Market Models, EEX (spot and futures market), Over-the-Counter (OTC) Trade, Market Coupling
2. Regulation
 - Charges and Incentive Regulation, Network Congestion Management
3. Demand Side Management
 - Smart Metering, Tariffs, Price Elasticity, Storage Systems, Electric Mobility
4. Advanced Pricing in the Smart Grid
 - Temporal Pricing, Spatial Pricing, Price Elasticity

Target audience

This course is dedicated to Master (MSc) students in economics and engineering economics.

Requirements

Basic knowledge in Economics (Micro/Macro) and Energy Economics

Organization

The lectures are grouped into blocks and will be held over 4 days. All lectures will take place at the Center for Wind Power Drives (CWD) in SeminarRaum CWD, Campus-Boulevard 61. The lectures are scheduled on following Wednesdays: April 26, 9:00-13:00, May 31, 12:00-18:00, June 28, 09:00-13:00, July 5, 09:00-13:00 hrs.

The exercise sessions will be held from 16:15 to 17:45 hrs (SemRaum 0024) on the following Mondays: Mai 8, June 12, 19, 26 and July 3, 10 and 17. Please note that the students are expected to discuss the problem sessions (which will be handed out in advance) with a short presentation. The presentations can be prepared in groups.

The exams dates are: August 18, 08:00-10:00, in room 1010|131 (AachenMünchener Halle); September 18, 17:00-19:00, in room 1385|002 (H02).
